3-layer hardwood panels are the best solution in terms of their structure and appearance when it comes to the natural, harmonious design of interiors. The 3-layer board Ministar has a top layer thickness of 3.5 mm. In combination with the middle layer, this results in the possible total thicknesses of 12.6, 16, 20, 26, 31 and 38 mm. All panels are glued with formaldehyde-free D3 glue. The edges are sawn, although further refinements are possible here.
